

# LEVERAGING RESEARCH FOR SCHOOL RESTART PLANNING

---

## Start building your return-to-school road map

The unprecedented COVID-19 school closures are affecting student academic achievement—so how can you plan for potential accelerated learning loss and greater learning variance among students? Join us to explore our recent research on learning loss—and discover practical strategies for addressing it. In these sessions, we'll focus on helping you understand, plan for, and mitigate the potential impacts of this extended pause when students return to school.

## Choose tailored sessions for your staff

Leveraging Research for School Restart Planning is available as two separate sessions: the leader session focuses on system-level planning, while the teacher session focuses on implications for classroom instruction. Both sessions are facilitated by an NWEA® Professional Learning Consultant in either an onsite or a virtual environment.

## Discover how to:

- + Connect research to the impacts of interrupted learning on student readiness
- + Identify specific data points in MAP® Growth™ and learn about other resources that can help you understand student readiness for learning
- + Create plans to adopt classroom practices that support students socially, emotionally, and academically
- + Outline action steps toward building responsive learning in your educational system

---

## WHO SHOULD ATTEND

### TEACHER SESSION

- + Teachers
- + Teacher leaders
- + Instructional coaches

### LEADER SESSION

- + School leaders
- + District leader

---

## DELIVERY OPTIONS

### VIRTUAL
